# 1. Introduction to Kernel for Impress

---

Welcome to the user manual for Kernel for Impress, the most effective and convenient .odp file repair tool available that repairs corrupt Open Office Impress documents. This user manual comprises step by step guidelines on using Kernel for Impress.

## 1.1 Using this Manual

---

This user manual is intended to guide users on using Kernel for Impress. We suggest that first time users should read this user manual completely and carefully before proceeding to use the software. However, if you are an experienced user, you can use the table of contents to find out information pertaining to the tasks that you need to perform by using Kernel for Impress. You can use the table of contents to navigate through different sections of this user manual. The table of contents lists all the sections that are contained in this user manual in chronological order. The user manual comprises the following sections:

- Introduction
- Getting Started
- Software Interface
- Repairing .odp files
- Full Version
- Support
- Troubleshooting
- Legal Notice

Certain abbreviations have been used throughout this manual. For clear understanding of the contents of this user manual, please go through the list of abbreviations, mentioned below, before reading the manual.

### 1.1.1 List of Abbreviations

ODP: OpenDocument Presentation

MS: Microsoft

RAM: Random Access Memory

MB: Mega-Byte

GB: Giga-Byte

## 1.2 About Kernel for Impress

---

Kernel for Impress is file repair and data recovery software for Open Office Impress. This software repairs Open Office Impress document files that become inaccessible due to unexpected system shutdown, power failure, virus attacks, media errors, etc.

You might be familiar with the following error messages if you have encountered Open Office Impress .odp file corruption before:

- The file 'file.odp' is corrupt and therefore cannot be opened. Should OpenOffice.org repair the file?
- General Input/Output error
- The file 'file.odp' could not be repaired and therefore cannot be opened

Kernel for Impress quickly and effectively resolves the above mentioned errors by repairing corrupt .odp files, keeping the complete document format intact. It restores images, slides, tables, formatting, master slides, Unicode characters, image objects, hyperlinks, embedded images, animations and all other components of the corrupt Impress document. The restored objects are then saved to newly created .odp files.

## 1.3 Salient Features

---

Salient features of Kernel for Impress include:

- Efficient and powerful embedded repair algorithms to quickly repair even heavy files
- Support for all versions of Open Office Impress
- Runs smoothly on every version of Windows
- User friendly graphical user interface
- Support for batch repair of .odp files
- Free demo to test the capabilities of the tool before purchasing it

## 1.4 Who Should Use this Software?

---

The capability of Kernel for Impress to repair large sized .odp files makes it appropriate for use by professional authors who keep their important presentation stored in Open Office Impress documents. The software is also suitable for other Open Office Impress users who have lost their important presentation stored in .odp files due to .odp file corruption. This corruption could have been caused due to virus attacks, improper system shutdown, installation of unsupported software, etc.

## 2. Getting Started

---

Now that you have understood the features and potential of Kernel for Impress, you are ready to get a hand on experience of the software. To start repairing .odp files, you will first need to download and install the software. However it is strongly recommended that before installing Kernel for Impress, you should go through the installation pre-requisites for the software to ensure that your computer is appropriately configured to run the software.

### 2.1 Installation Pre-requisites

---

The various pre-requisites for installing and running Kernel for Impress can be broadly classified into two major categories – Hardware requirements and Software requirements.

#### 2.1.1 Hardware Requirements:

The hardware requirements for installing the software are as follows:

- Pentium class processor
- Minimum 64MB RAM (128 MB recommended)
- 10MB for Software installation
- Disk Space - Enough space to store the repaired files

 You should have at-least 10 MB of free disk space if you want to repair and save a 10 MB.odp file.

#### 2.1.2 Software Requirements:

The software requirements for installing the software can further be grouped into two categories – Operating system requirements and Open Office version requirements. The requirements are as follows:

##### 2.1.2.1 Operating System Requirements

Supported operating systems:

- Windows Vista
- Windows XP
- Windows 2003
- Windows 2000

### 2.1.2.2 Open Office Version Requirements

Supported Open Office versions:

- All versions of Open Office

## 2.2 Downloading Kernel for Impress for the First Time

---

After checking your computer with the prescribed system requirements for Kernel for Impress, you can download and install the software on your computer. You can buy the full version of the software from any one of our authorized resellers– Element5, Asknet and 2CO.

If you want to try using Kernel for Impress before buying it, you can download the evaluation version from the following link:

<http://www.nucleustechologies.com/download-openoffice-impress-recovery.php>

 You can repair .odp files saved on your system by using the evaluation version of Kernel for Impress; however, the repaired file will display the text 'Demo' instead of the original text until you purchase the full version of the software.

## 2.3 Install Kernel for Impress

---

After downloading the installer file for Kernel for Impress, you can install the software by running the file.

To install Kernel for Impress:

1. Double-click the Kernel for Impress installer.
2. Follow the on-screen instructions.

The **Setup Installation Complete** screen will be displayed.

3. Click **Finish** to launch the software.

## 2.4 Start Kernel for Impress

---

To start Kernel for Impress:

Click the **Start → All Programs → Kernel for Impress**

Alternatively, you can launch Kernel for Impress by double-clicking the shortcut icon available on the Desktop and Quick Launch icon.

## 2.5 Uninstall Kernel for Impress

---

You may need to uninstall and re-install Kernel for Impress.

To uninstall Kernel for Impress:

1. Click the **Start → All Programs → Kernel for Impress → Uninstall Kernel for Impress**

A warning message will be displayed.

2. Click **Yes** to uninstall Kernel for Impress.

 Before proceeding to uninstall Kernel for Impress, you must ensure that the software is not running.

You can alternatively uninstall Kernel for Impress from the **Control Panel** by performing the following steps:

1. Click the **Start Menu → Control Panel** and then double click the **Add or Remove Programs** icon.
2. Select **Kernel for Impress** and click **Remove**.

A warning message will be displayed.

3. Click **Yes** to uninstall Kernel for Impress.

# 3. Software Interface

---

Now that Kernel for Impress has been installed on your computer, you can start using the software after getting acquainted with the software interface.

## 3.1 Menu-bar

---

The menu-bar of Kernel for Impress comprises three main menus– File, View, and Help.

### 3.1.1 File Menu

The **File** menu comprises four menu items.

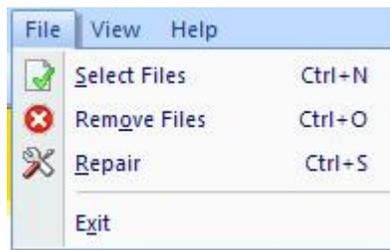

Figure 3.1: File Menu

Menu items in the **File** menu:

Field Name	Field Description
Select Files	Select to browse and list corrupt .odp files stored on your hard disk
Remove Files	Select to remove selected files from the list
Repair	Select to start the repairing corrupt files
Exit	Select to close the software

### 3.1.2 View Menu

The **View** menu comprises three menu items.

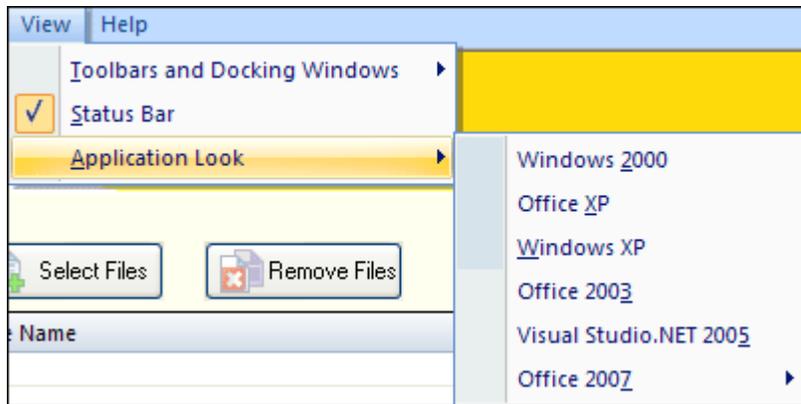

Figure 3.2: View Menu

Menu Items in the View menu:

Field Name	Field Description
Toolbars and Docking Windows	Select to show or hide Tool bar/Standard bar
Status Bar	Select to show or hide Status bar
Application Look	Select to change the software theme

### 3.1.3 Help Menu

The **Help** menu comprises three menu items.

Figure 3.3: Help Menu

Menu items in the Help menu:

Field Name	Field Description
------------	-------------------

Software Help	Select to view help information pertaining to performing various tasks using Kernel for Impress.

About Kernel for Impress

Select to view version-related and support information of Kernel for Impress

## 3.2 Tool-bar

---

The tool-bar in Kernel for Impress is displayed below the menu-bar. The tool-bar provides a convenient and user-friendly method to perform certain actions that can also be performed by using the menu-bar. Read the information in the table below to find out about the tool-bar buttons:

Button	Button Name	Button Description
	Select File(s)	Select to browse and list corrupt .odp files stored on your hard disk
	Remove Files	Select to remove selected files from the list
	Repair Files	Select to start the repairing of corrupt odp files
	About	Select to view version-related and support information of Kernel for Impress

You can display or hide the tool-bar by using the **Toolbars and Docking Windows** menu item in the **View** menu of the menu-bar.

### 3.3 Status Bar

Status bar is displayed at the bottom of the software window. The text 'Ready' is displayed on the status bar if Kernel for Impress is ready to be used. Status bar also displays the text 'CAP', 'NUM', 'SCRL' which respectively correspond to the Caps Lock, Num Lock, and Scroll Lock keys on your keyboard. If any of these keys are pressed, the color of the corresponding text will turn blue/black.

Figure 3.4: Status Bar

### 3.4 Buttons Used

Apart from the standard options available in the menu-bar and the tool-bar, three buttons– **Select Files**, **Remove Files**, and **Next**–are displayed on the main window, with other buttons on further windows.

	Click to browse and select the .odp file that needs to be repaired
	Click to remove selected files from the list of .odp files
	Click to repair and save the files
	Click to stop the repair and save process
	Click to view main window of the software
	Click to close the software

### 3.5 Customize User Interface

You can customize the theme of Kernel for Impress by selecting your desired theme from the **Application Look** menu item in the **View** menu. You can add or remove toolbar buttons by clicking:

→**Standard**→**Add or Remove Buttons** in the toolbar and selecting appropriate buttons.

## 4. Repairing .odp Files

---

Now that you have complete familiarity of the user interface of Kernel for Impress, you are ready to repair .odp files. To repair .odp files:

1. Launch Kernel for Impress.
2. Click the **Select Files** button to browse and list corrupt ODP files.

 You can select multiple .odp files to repair them in one repair cycle. You can remove any file from the list by selecting the file from the list and clicking **Remove Files**.

3. Click **Next** to start with the .odp file repairing process. After you click **Next**, the software asks you to define the location to save the repaired file.
4. Browse to your desired location and click **OK**.

As soon as the Kernel for Impress finishes the repairing and saving process, it displays the message '**The repairing process was completed successfully**' along with a link that points to the location where the repaired .odp files are saved.

5. Click the link to view the repaired files or click **OK** to close the message box.

 The names of the repaired .odp files will be the original file name prefixed by the text 'REC'.

# 5. Full Version

---

Although you can use Kernel for Impress evaluation version for free and experience the capabilities of the software, there are certain features that are not available in the evaluation version.

## 5.1 Requirement of Full Version

---

By using the evaluation version of Kernel for Impress, you can repair corrupt .odp files; however, you cannot view the original content of the repaired files. The text 'Demo' will be displayed instead of text and images, software will display any three images from the document.

You will need to buy the full version of the software to view the original content of the .odp files.

## 5.2 Purchasing Full Version

---

You can buy the full version of Kernel for Impress from any one of our authorized resellers – Element5, Asknet and 2CO.

As soon the purchase transaction with our resellers gets completed, our sales team will send you an email comprising the URL to download the full version of Kernel for Impress and activation details of the software.

## 6. Support

---

We have an extensive and efficient support system in place to assist our customers with all issues related to using Kernel for Impress. The software comes with an embedded help manual that can be accessed by clicking **Help→Software Help** in the menu-bar. You can also press the F1 key on the keyboard of your computer to access the embedded help of Kernel for Impress.
