# Kernel for Exchange Server

## Installation/Uninstallation Guide

## Install Kernel For Exchange Server

The installation process of the software involves a few easy steps. Before proceeding, make sure you have the setup file. If you don't have the setup, then go to the website and install it.

**Product Page URL** : https://www.nucleustechnologies.com/exchange-server-recovery.html

Once you get the installer file, follow the steps below to install the software accurately:

- ✓ Locate the **Kernel For Exchange Server installer** file and double click on it.
- ✓ Next, follow the on-screen instructions.
- ✓ Once installation is done, a success message saying **Setup Installation Complete** appears on screen.
- ✓ Click on the **Finish** button to launch the software.

After successfully completing the installation process, a software shortcut will be added to the **Windows Start Program** menu. You can either launch the software from the Program Menu or create a desktop icon to directly launch it.

# Uninstall Kernel For Exchange Server

You can uninstall Kernel For Exchange Server from your system with two methods listed below:

- ✓ From the Windows **Start** menu
- ✓ From the **Control Panel**

# Uninstall from the Windows Start Menu

- ✓ Click on the **Start** menu and go to **All Programs**.
- ✓ Click on **Kernel For Exchange Server** » **Uninstall Kernel For Exchange Server**.
- ✓ You will get a warning message before uninstalling the software on the screen.
- ✓ Click on **Yes** to uninstall the software.

# Uninstall from the Control Panel

- ✓ Click on the **Start** button, then **Control Panel**.
- ✓ Go to **Programs and Features** and look for **Kernel For Exchange Server**.
- ✓ Right-click on Kernel For Exchange Server and click on the **Uninstall** button.
- ✓ You will get a warning message before uninstalling the software on the screen.
- ✓ Click on **Yes** to uninstall the software.

Kernel For Exchange Server will be successfully uninstalled from your computer system.
