MS: Microsoft

RAM: Random Access Memory

MB: Mega-Byte

GB: Giga-Byte

1.2 About Kernel for Access Password Recovery

Kernel for Access Password Recovery is password recovery software to recover lost or forgotten password of MS Access Databases (.MDB). It recovers passwords from all versions of MS Access Databases.

Despite the complexity and length of the password, Kernel for Access Password Recovery effectively recovers the actual password of MS Access databases to unlock the password protected mdb files. It easily restores the password and allows you to access your highly encrypted password protected database file.

1.3 Salient Features

Following are the key features of Kernel for Access Password Recovery:

- Embedded with strong and efficient recovery engine to unprotect the password protected mdb files
- Easy to use, no technical skills required to work with the software
- Recovers the actual password of MDB files
- Support to highly encrypted password protected MDB files
- Instant password recovery
- Multilingual password recovery
- Recovered password can be easily copied to the clipboard
- Free demo to analyze working of the software before buying Full version of the software

1.4 Who Should Use this Software?

The incorporation of powerful password recovery engine to recover highly encrypted password of Access database files makes it best choice for MS Access users and database administrators. It finds its way widely in organizations where the database administrators safeguard organization's valuable data against any un-authorized use. To prevent un- authorized access, databases files are protected with strong passwords but sometimes administrator tends to loose or forget the passwords.

2. Getting Started

Now that you have understood the features and potential of Kernel for Access Password Recovery, you are ready to get hands on experience of the software. To start with the password recovery procedure, you will first need to download and install Kernel for Access Password Recovery software.

It is strongly recommended that before installing Kernel for Access Password Recovery software, you should go through the installation pre-requisites for the software to ensure that your computer fulfills all the requirements required to run the software.

2.1 Installation Pre-requisites

The various pre-requisites for installing and running Kernel for Access Password Recovery can be broadly classified into two major categories – Hardware requirements and Software requirements.

2.1.1 Hardware Requirements:

The hardware requirements for installing the software are as follows:

- Pentium Class Processor
- Minimum 64MB RAM (128 MB recommended)
- 10MB for Software installation

2.1.2 Software Requirements:

The software requirements for installing the software can further be grouped into two categories – Operating system requirements and MS Access versions. The requirements are as follows:

2.1.2.1 Operating System Requirements

Supported Operating Systems:

- Windows Vista
- Windows XP
- Windows 2003
- Windows 2000

2.1.2.2 MS Access Version Requirements

Supported MS Access versions:

- MS Access 97

- MS Access 98
- MS Access 2000
- MS Access 2002
- MS Access 2003
- MS Access XP

2.2 Downloading Kernel for Access Password Recovery for the First Time

After checking your computer with the prescribed system requirements for Kernel for Access Password Recovery, you can download and install the software on your computer. You can buy the full version of the software from any one of our authorized resellers – Element5, Asknet and 2CO.

If you want to evaluate the software features and potential of the software before buying it, you can download its evaluation version from the following link

<https://www.nucleustechnologies.com/download-mdb-password-recovery.php>
