V19.8

Kernel for MBOX to PST

Introduction

Kernel for MBOX to PST, with its support for 20 major MBOX emails clients, is a popular tool for the migration of mailbox items to Outlook from Apple Mail, Thunderbird, Opera, SeaMonkey, etc. And this user-friendly tool simplifies the migration process and executes it as per the requirements of the user.

Kernel for MBOX to PST migrates multiples MBOX files to PST at a time, providing many filtering options and multiple saving options. Also, users can preview the MBOX data prior to saving it.

The latest version introduces more saving options and offers more efficient MBOX to PST conversion. Also, it now can be used with all the versions of 20 supported email clients.

Updates

⋯⋯➤ Saves MBOX data to MS Exchange Server, Novell GroupWise, and IBM Domino

⋯⋯➤ Exports emails to Yahoo, Gmail, AOL, iCloud, Google Apps, and Outlook.com

⋯⋯➤ Saves mailbox items to DBX, MSG, TXT, RTF, PDF, HTML, and MHTML formats

⋯⋯➤ Works seamlessly with all the versions of 20 major MBOX email clients

⋯⋯➤ Enhanced performance

These new features will help MBOX users to meet even advanced MBOX to PST conversion requirements.
