

Kernel G Suite Backup

Installation/ Uninstallation

Install the Software

The software can be installed in a few easy-to-follow steps and takes only a few minutes. To install the software, you need to have the installer in place. If you don't have the installer then you can download the same from our website: <https://www.nucleustechologies.com/g-suite-backup/>

Once you have the installer file, you can execute the following steps to install the software:

- Double click on the Kernel G Suite Backup Installer file.
- Follow the onscreen instructions. When the installation process completes "Installation Complete" message appears on the screen.
- Click on the Finish button to launch the software.

Uninstall the Software

The software is one of the safest to use and undergoes clean uninstallation which can be done in any of the following ways:

- **Uninstalling from the Control Panel**
- **Uninstalling from Windows Start Menu**

Note: Before uninstalling the software just ensure that it is not in use and MS Outlook is also closed.

Uninstalling from the Control Panel

Execute the following steps to uninstall the Application through Control Panel:

- Click Start -> Control Panel. The Control Panel window appears.
- Double-click the Add or Remove Programs icon. A list of the programs installed on your computer appears.

- Select Kernel G Suite Backup and click the Remove button. A warning message before uninstalling the software will be displayed on the screen.
- Click the Yes button to un-install the software.
- Click the OK button.

This will uninstall the Kernel G Suite Backup software from your system.

Uninstalling from Windows Start Menu

Execute the following steps to uninstall the software through Window Start Menu:

- Click Start > All Programs > Kernel G Suite Backup> Uninstall Kernel G Suite Backup. A warning message before uninstalling the software will be displayed on the screen.
- Click the Yes button to uninstall the software.
- Click the OK button.
- This will uninstall the Kernel G Suite Backup software from your system.
