

A new tool from Kernel to facilitate SharePoint migrations

Hi,

We are introducing a new tool to facilitate quick and easy SharePoint migrations. Now the files from different sources can be easily migrated to SharePoint.

As you have been an ardent promoter of Kernel's Software, we believe that you will promote this new tool enthusiastically.

Introduction - What makes Kernel Migrator for SharePoint desirable?

Kernel Migrator for SharePoint software is useful for every organization which wants to migrate to SharePoint. It protects the data saved in the documents and migrates documents, folders, views, list items, web parts, and workflows, etc.

Features of Kernel Migrator for SharePoint

- A pre-migration analysis before starting the actual migration -it clears the air on any possible chances of error.
- It migrates file system data to any desired version of SharePoint server, SharePoint Foundation, and SharePoint Online.
- It supports migration of Public folder to SharePoint. You can choose Public Folder from any Exchange Server or Office 365.
- It migrates attributes of every file/folder, permissions, etc.
- There are multiple settings like overwrite the file if it exists, upload file only if the target file exists, and different filters like date filter, file filter, user filter, etc.
- You can choose to schedule the migration process to start or stop at a specified time. The migration gets started at the scheduled time without user assistance.

All the features help users to perform requirement-based SharePoint migration. And you can start migration just after selecting the source and destination.

Supported Platforms

- **Operating System:** Windows 10, Windows 8.1/8, Windows 7, Windows Vista, Windows XP, Windows 2000, Windows 98, Windows NT, and Windows 95.
