1.2 About Kernel for MBOX to PST

Kernel for MBOX to PST is an advanced and professional email migration software that facilitates migrating MBOX files created with numerous email clients including AppleMail, Entourage, Eudora, Postbox, Netscape, PocoMail, Thunderbird, Spicebird, Opera, PowerMail, Claws Mail, Evolution, SeaMonkey, Sylpheed, Mulberry, GyazMail, Gnu, Sparrow, and The Bat! into easily accessible Microsoft Outlook .PST or .MSG file formats. Enriched with powerful email migration algorithms, Kernel for MBOX to PST software efficiently converts MBOX files to PST or MSG files.

Using Kernel for MBOX to PST, all the mailbox folders contained within the MBOX files including Inbox, email attachments, sent items, drafts, junk folder, deleted items folder, etc. are accurately converted into PST or MSG format. While performing the email migration, the software preserves the original MBOX file data along with its structure and properties. The software facilitates adding multiple MBOX files at once by using 'Add Files' button along with option to add an entire disk or folder using 'Add Folder' button. The software facilitates preview of added MBOX files before saving and allows saving converted emails in folder hierarchy.

Offered easy-to-use, self-descriptive, user-friendly Graphical User Interface of Kernel for MBOX to PST makes the entire email migration process a much easier task even for novice users. Available free to download trial version lets users evaluate its capabilities before purchasing the full licensed version.
