WHAT'S NEW

v23.1

Kernel IMAP Email Backup

Introduction

Kernel IMAP Email Backup tool allows users to back up their IMAP mailboxes quickly.

It offers several enhanced features and multiple filtering options like folder selection, date range, exclude a folder, etc. which can be used for incremental and selective backup.

The newest version of Kernel IMAP Backup 23.1 is now available with improved IMAP server connectivity and increased backup speed.

It even allows the backup of UNICODE email servers. With its trial version, you can backup up to 10 items per folder from an IMAP mailbox.

Updates

- Faster and more efficient IMAP backup process.

- Better support for IMAP servers, including improved handling of IMAP subfolders.

- Better folder expansion of IMAP mailboxes.

- Improved performance and accuracy while bulk IMAP mailboxes backup.

- Improved and more interactive user-interface to backup IMAP mailboxes.

The added features in the latest version have improved the overall speed and accuracy of the Backup process.
