

What's New

In Kernel IMAP to Office 365 19.4

This document describes the latest updates to Kernel IMAP to Office 365

Introduction

Kernel IMAP to Office 365 version 19.4 allows quick and easy migration of IMAP mailboxes to Office 365.

This utility is enriched with smart features like selective data migration (migrate data based on date/item type, exclude deleted/empty folders) bulk migration using CSV file, and many more.

The latest version of Kernel IMAP to Office 365 19.4 is now enhanced with an improved IMAP connection that helps in importing IMAP mailbox data to Office 365 more efficiently. The trial version allows you to migrate up to 10 items per folder from an IMAP mailbox.

Latest Enhancements

Kernel IMAP to Office 365 Version 19.4 has the following updates:

- Improved IMAP connection for a faster migration process.
- Fixed minor issues with the IMAP folder hierarchy (Delimiter related).
- Fast and secure migration of IMAP mailboxes to Office 365.
- Improvements in the bulk migration of IMAP mailboxes to Office 365.

The added features in the latest version have improved the overall speed and accuracy of the migration process.
