

## What's New

### In Kernel Migrator for SharePoint 19.1

*This document describes the latest enhancements to Kernel Migrator for SharePoint 19.1*

## Introduction

Kernel Migrator for SharePoint is an effective migration tool which allows the user to migrate SharePoint data to another SharePoint Server. It accesses the sites, sub-sites, list and libraries, site collections, etc. from the source and places them neatly at the desired destination.

There is an inbuilt scheduler which lets the user schedule the migration at a fixed time and the migration will start automatically at the right time. It also migrates the metadata along with the primary data.

Additionally, there are multiple migration options available like Public Folder to SharePoint, SharePoint to SharePoint, and Windows File System to SharePoint, OneDrive for Business, & Google Drive.

## Latest Enhancements

*Kernel Migrator for SharePoint 19.1 has the following updates:*

- Better connection with SharePoint Server.
- Adds Google Drive as source.
- Adds OneDrive for Business as source.
- Google Drive-to-Google Drive migration.
- Backs up Google Drive & One Drive data.
- Enhanced speed for the migration.

*These new features improve the efficiency and accuracy of SharePoint migration.*
