

# What's New

## In Kernel Office 365 Migrator for Lotus Notes –Version 18.4

*This document introduces the latest updates to Kernel Office 365 Migrator for Lotus Notes*

### Introduction

Kernel Office 365 Migrator for Lotus Notes ver. 18.4 transfers both Notes and Domino server NSF files to Office 365 more efficiently with a simple user interface.

It helps in migrating single or multiple NSF mailboxes to Office 365 maintaining folder hierarchy.

The tool allows selective migration of NSF and Domino mailboxes with its folder mapping feature and 'View Folder' option. It also allows to assign 'Impersonation Rights' to user mailboxes.

The updated version, Kernel Office 365 Migrator for Lotus Notes, 18.4 has made the tool more robust with new features for selective, smooth and efficient Lotus Notes data migration.

### Latest Enhancements

*Kernel Office 365 Migrator for Lotus Notes Version 18.4 comprises the following updates:*

- **Interactive and easy-to-work-with GUI**
- **Folder mapping option to map mailbox folders.**
- **Option to assign 'Impersonation Rights' to user mailboxes**
- **Option to view folders created by Notes itself**
- **Supports to all IBM Notes and Domino Server versions**

*This recent version made the tool a more powerful and efficient Notes migration solution.*
