

# What's New

## In Kernel Office 365 Migrator for Lotus Notes –Version 19.2

*This document includes the recent updates to Kernel Office 365 Migrator for Lotus Notes*

### Introduction

Kernel Office 365 Migrator for Lotus Notes ver. 19.2 migrates Notes and Domino Server NSF files data to Office 365 efficiently using interactive and simple user interface.

It can migrate only the required data to the destination with useful filters like Date range, Mail categories, Folder mapping, Folder exclusion, Avoid duplicate items, etc.

The updated version, Kernel Office 365 Migrator for Lotus Notes, 19.2 now is integrated with advanced algorithms and can skip duplicate items from mailbox folders during migration. Now the tool allows to mark the items as *Read* or *Unread* after migration.

### Latest Enhancements

*Kernel Office 365 Migrator for Lotus Notes Version 19.2 has the following updates:*

- **Provision to skip duplicate items during migration**
- **Option to mark migrated item status as Read or Unread**
- **Faster migration after fixing minor bugs**
- **Algorithm modification to improve accuracy and performance**

*This latest version has made migration faster and more accurate with introduction of new features.*
