

WHAT'S NEW

v21.0

Kernel Office 365 Migrator for
Lotus Notes

Introduction

Kernel Office 365 Migrator for Lotus Notes migrates local/Domino Server NSF files and SmartCloud Notes data to Microsoft 365 easily and effectively.

It migrates all NSF file items with smart filter options like Date range, Item categories, etc., supporting all Notes versions.

The latest update of the tool has improved migration speed and performance. The new version 21.0 allows Notes/Domino Server/ SmartCloud Notes NSF file migration to Office 365 mailbox, public folder, archive mailbox, or Groups.

Updates

-> Fixed minor bugs and earlier issues
-> Enhancement in migration speed and performance
-> Direct migration to Office 365 Groups
-> Supports migration of Domino Server, SmartCloud Notes, and local NSF files to Office 365 mailbox,

The latest updates of Kernel Office 365 Migrator for Lotus Notes v21.0 facilitates flexible and advanced Notes to cloud
