WHAT'S NEW

v21.2

Kernel Office 365 Migrator for Lotus Notes

Introduction

Kernel Office 365 Migrator for Lotus Notes migrates local/Domino Server NSF files and SmartCloud Notes data to Microsoft 365 easily and effectively. It migrates all NSF file items with smart filter options like Date range, Item categories, etc., supporting all Notes/Domino versions.

The latest updates to the tool have improved the migration speed and performance. The new version 21.2 provides Modern Authentication to ensure error-less Office 365 login.

Updates

- Offers two Office 365 login modes – Basic Authentication & Modern Authentication

- Allows error-free Office 365 login in all situations

- More efficient and accurate after the bug fixes and algorithm updates

- Supports all Office 365 plans and Domino/Notes versions

These new updates have improved the efficiency and accuracy of NSF to Office 365 migrations.
