

## What's New

# In Kernel Outlook Duplicate Remover

*This document describes the latest updates to Kernel Outlook Duplicate Remover 20.6.*

## Introduction

Kernel Outlook Duplicate Remover is an excellent utility to remove duplicate items like emails, messages, tasks, etc. from your Outlook profiles. It offers two modes of duplicate removal – within the same folder or selected folders.

The updated version of Kernel Outlook Duplicate Remover enables users to remove all the duplicate items from their Outlook profiles like Office 365 Outlook, Outlook 2019, Outlook 2016, etc. Also, it allows you to save the duplicate item removal report in HTML format.

## Latest Enhancements

Kernel Outlook Duplicate Remover Version 20.6 includes the following updates:

- Improved support for Outlook 2019, Outlook 2016, and Office 365 Outlook
- Enhanced user interface
- Support for both ANSI and UNICODE formats PST files

The latest updates to Kernel Outlook Duplicate Remover has improved the performance of the tool.
