Kernel for Excel Repair

Introduction

Kernel for Excel Repair, as the name suggests, is an automated tool that can recover corrupt Excel (.xls or .xlsx) files.

An Excel file can get infected due to many reasons and losing it may give nightmares to many of us. We understand the importance of every single entry you would have made and hence have come up with such an efficient tool that can repair any sort of corruption and recover any number of files with total integrity.

This tool can recover text, links, forms, charts, reports and every sort of graphical or textual information your Excel file contains.

Updates

-> Recovers Excel files from MS Excel 2019.
-> Fixes all types of Excel errors
-> Faster Excel recovery
-> More precise Excel recovery
-> More intuitive and self-descriptive
-> Enhanced quality of recovered content

These updates make the tool more useful to all types of Excel users.
