

What's New

In Kernel for Excel Repair 18.10

This document describes the latest enhancements to Kernel for Excel Repair

Introduction

Kernel for Excel Repair is an outstanding data recovery tool which helps in repairing the corrupt .xls or .xlsx file.

An Excel file gets corrupt due to various physical and logical reasons like virus attacks, abrupt system shutdowns, improper MS Excel usage, the occurrence of bad sectors in storage media, etc.

Kernel for Excel saves you from bearing the loss of crucial information from Excel files. Whether it is textual information, links, forms, charts, or reports, the software effectively recovers all the information in original format

Latest Enhancements

Kernel for Excel Repair Version 18.10 has the following updates:

- Recovers Excel files from MS Excel 2019.
- Extracts information from large Excel files.
- Recovers charts, images, and formulae.
- Recovers Excel files faster.
- Offers accurate Excel recovery.

These new features improve the efficiency and accuracy of Excel recovery using Kernel for Excel Repair.
