

What's New

In Kernel Lotus Notes to Outlook –Version 18.4

This document introduces the latest updates and advancements to Kernel for Lotus Notes to Outlook

Introduction

Kernel for Lotus Notes to Outlook, ver. 18.4 performs smooth migration of Notes .nsf files to Outlook .pst files and to Exchange Server.

The software incorporates attractive features like automated mapping, bulk migration (using CSV files), date range filters, split PST file option, and folders exclude/include options.

With its simple user-interface and robust migration techniques, the latest Kernel for Lotus Notes to Outlook, ver. 18.4 has improved a lot in its performance.

The updated tool now saves 10 items/folder from both Notes and Domino Server files with its Demo/Trial version.

Latest Enhancements

Kernel for Lotus Notes to Outlook, version 18.4 is improved with the following updates:

- **Simplified user-interface**
- **Trial version saves 10 emails/folder from both Notes and Domino files**
- **Advanced folder(s) filters and automated mapping with CSV file**
- **Fast recovery and improved accuracy**

The latest version has improved the speed and accuracy of the migration process.
