

What's New

In Kernel for Novell GroupWise to Exchange 18.5

This document describes the latest enhancements to Kernel for Novell GroupWise to Exchange 18.5

Introduction

Kernel for Novell GroupWise to Exchange is quick and result oriented software to migrate from Novell GroupWise Server environment to MS Exchange Server or Office 365 environment.

It easily migrates user mailboxes, calendar, tasks, personal address books and stores them in the user's new mailboxes on MS Exchange Server. Kernel for Novell GroupWise to Exchange provides secure migration to exchange server and .PST file of MS Outlook.

With the integration of latest proxy access feature, user has access to GroupWise mailboxes with full proxy user rights

Latest Enhancements

Kernel for Novell GroupWise to Exchange Version 18.5 has the following updates:

- Improved connectivity to multiple mailboxes with Proxy Access.
- Supports each Outlook version to access GroupWise Address Book.
- Improved user interface and design.
- Faster conversion speed after some minor bug fixes.

These new features improve the efficiency and accuracy of GroupWise to PST/Exchange Online/Office 365 migration.
