WHAT'S NEW

v21.04

Kernel Duplicate File Finder

Introduction

Kernel Duplicate File Finder is a proficient tool to find duplicate files on Windows drives and folders.

It integrates a simple GUI and can find duplicate files based on file type, size, and other criteria. The duplicate files are shown along with all the essential details on the tool's interface for easy decision-making. Users can move or delete duplicate files as per their requirements.

The latest version finds duplicate files more efficiently and accurately, ensuring a smooth user experience.

Updates

→ Improved speed, accuracy, and performance

→ Fixed minor glitches and bugs

→ Easy to install and use

→ Support for all Windows versions

The latest updates in Kernel Duplicate File Finder make it the simplest tool for managing duplicate files on Windows
