

What's New

In Kernel G Site Backup Tool V. 21.2

This document provides the recent updates to Kernel G Suite Backup Tool, V21.2.

Introduction

Kernel G Suite backup tool is a simple tool to backup G Suite mailboxes, Calendar, Contacts, and Google Drive data. With its simple interface, it ensures easy backup of data as per the needs of the user.

It offers bulk backup of mailboxes and provides many filtering and saving options. One can backup single or multiple user data, adding them either manually or using a CSV file.

The latest version offers better features and improved performance.

Latest Updates

Kernel G Suite Backup Tool, Version 21.2 has the following updates.

- Offers more precise backup of calendar items
- Provides a complete view of the mailbox list
- Performs unlimited mailbox backup
- Supports the backup of UNICODE emails

With these latest updates, Kernel G Suite Backup Tool offers a smoother and more efficient backup of G Suite data.
