What's New

In Kernel G Suite to Office 365 Migration 22.1

This document describes the latest enhancements to Kernel G Suite to Office 365 Migration

Introduction

The tool allows you to migrate multiple mailboxes using a Google Workspace Super Admin account and an Office 365 Global administrator account. Also, you can use a CSV file to migrate multiple mailboxes simultaneously. It increases the accuracy and speed of the migration. The G Suite to Office 365 tool gives you the option to map the source mailboxes with the destination mailboxes – manually or using a CSV file. Such a facility reduces the chances of errors and improves speed.

The G Suite to Office 365 migration completes in just four steps – Add source & destination accounts, Map source & destination mailboxes, Filter data, and migrate. With these simples' steps and user-friendly GUI anyone can perform this migration without any issues.

Latest Enhancements

Kernel G Suite to Office 365 Migration 22.1 has the following updates:

➢ *Faster migration of large-sized G Suite mailboxes with complete emails.*
➢ *Enhanced of Contacts and Calendar items migration from G Suite to Office 365.*
➢ *Better preview of OWA Calendar items after migration in the destination.*

These new features improve the efficiency and accuracy of G Suite to Office 365 Migration.
